EUDR COMPLIANCE POLICY – Agrigear Ltd
Issued by: Agrigear Ltd
Subject: Compliance with EUDR Regulation – Due Diligence on Sustainable Sourcing

---

OVERVIEW

As a leading supplier of Wheel and Tyres **Agrigear Ltd** is committed to conducting business responsibly and sustainably while maintaining the highest standards of environmental and ethical performance.
In accordance with the **European Union Deforestation-free Regulation (EUDR)**, Agrigear Ltd has implemented a due diligence framework designed to ensure compliance with regulatory requirements and to minimize the risk of deforestation and forest degradation associated with commodities and products that may be present within our supply chain, including natural rubber and other applicable commodities covered by the regulation.

COMMITMENT TO COMPLIANCE

In alignment with the requirements of the EUDR, Agrigear Ltd formally commits to implementing and maintaining effective due diligence measures to identify, assess, and address environmental and sourcing risks within our supply chain.
The three fundamental steps of our due diligence process are as follows:

1. COLLECTION OF INFORMATION

Agrigear Ltd will actively collect relevant information from suppliers and business partners, including:

- Detailed information regarding the origin and source of raw materials and products that may fall within the scope of the EUDR.
- Supply chain data enabling traceability of materials from origin to final product.
- Supporting documentation demonstrating compliance with applicable legal requirements in the country of production.
- Certification status and evidence of sustainable sourcing practices, where applicable, including adherence to recognized environmental and sustainability standards.
- Supplier declarations and due diligence statements confirming compliance with EUDR requirements.

---

2. RISK ASSESSMENT

Agrigear Ltd will undertake regular risk assessments to evaluate the likelihood that products or raw materials within our supply chain may be associated with deforestation, forest degradation, or non-compliance with applicable legislation.
Depending on the risk level classification of the countries of origin, this process will include:

- Assessing geographic sourcing regions and their potential exposure to deforestation-related risks.
- Reviewing supplier sourcing practices, environmental management systems, and legal compliance records.
- Evaluating the effectiveness of supplier due diligence procedures and traceability systems.
- Monitoring regulatory developments, industry guidance, and emerging environmental risk data.
- Regularly reviewing supplier risk profiles to ensure a proactive and informed approach to compliance.

3. RISK MITIGATION

Where potential risks are identified, Agrigear Ltd will take appropriate measures to mitigate and manage those risks, including:

- Engaging directly with suppliers to obtain additional information, clarification, or corrective action plans.
- Working collaboratively with suppliers to improve sourcing practices and strengthen compliance with EUDR requirements.
- Requiring suppliers to implement corrective actions where deficiencies are identified.
- Conducting enhanced due diligence for higher-risk suppliers or sourcing regions.
- Suspending or terminating business relationships with suppliers that consistently fail to demonstrate compliance or an acceptable commitment to corrective action.
- Supporting industry initiatives and stakeholder collaboration aimed at promoting sustainable and deforestation-free supply chains.

STATEMENT OF ACCOUNTABILITY

Agrigear Ltd affirms its commitment to full compliance with the European Union Deforestation-free Regulation (EUDR) and to the continuous improvement of its due diligence processes.

Through the implementation of effective information gathering, risk assessment, and risk mitigation procedures, Agrigear Ltd aims to ensure that products supplied to our customers are sourced responsibly and contribute to global efforts to prevent deforestation and environmental degradation.

By signing this document, Agrigear Ltd confirms its commitment to responsible sourcing, environmental stewardship, and compliance with all applicable EUDR requirements.
